

aluminium

The new range of Lumi aluminium windows has been created after listening to the wishes of window installers. The new range is a lighter, slimmer window that still retains its designer good looks but now makes it a perfect replacement option for the home improvement market.

**LIGHT WEIGHT,
BUT NOT A LIGHTWEIGHT**

Lumi's iconic 'frameless' look and super-slim sightlines are now available in easier-to-handle aluminium units. They are everything that's good about Lumi, just lighter.

**PROTECTS OUR PLANET
PROTECTS THEIR HOME**

Lumi windows are filled with Argon gas, use low E-glass and have internal thermal breaks to retain more heat. That's good news for your customers' fuel bills and brilliant news for the environment. We also believe that striving for the ultimate window shouldn't compromise security. That's why every Lumi window has a high-security locking system and anti-leverage hinge bolts as standard across the range.

EASY DOES IT

Lumi's light, slim windows are easy to install, especially as they arrive on-site fully assembled, with no cutting required. And because of their new, slim profile they slot straight into the cavity left by the windows you're replacing.

Lumi Aluminium Double Glazed
Our slimmest ever design, with a fine border and generous sight lines mean it's perfect for all uses. The strength and durability of aluminium make it our most popular current model.

Lumi Aluminium Triple Glazed
Slim design with the soundproofing and energy efficiency of triple glazing, this window is perfect for windows exposed to harsh elements, making it a great combination partner with the double-glazed version.
