Transform
your home

The most elegant way to transform how your home looks, how it feels, and how you enjoy living in it.

Lumi won't just transform your home's appearance, it will look after your family's safety with super-secure features and protect the environment by being amazingly energy efficient.

Lumi's edge to edge design with no vertical or horizontal frame allows more light in. Argon filled and ultra-bonded they let less heat out.

The appeal of Lumi is more than surface deep. Robust security features are built in, making Lumi one of the most security-conscious window designs in the world.

Lumi's sleek, modern design will transform the look of your home, no matter what sort of home it is.

Perfect for replacing your old windows, Lumi has been designed to slot into the space they leave behind.

LUMI WINDOWS

Lumi's clean lines add modern elegance and cutting-edge sophistication to your home's exterior. They look amazing from the inside too. With a vast expanse of glass, nothing comes between you and your view.

Lumi glass is bonded flat to the unit structure and fixed in place with super-tight double gasket technology. It's not just great for letting light in, it's brilliant at keeping noise out.

LUMI
LIFT & SLIDE
DOORS

Take the inside out; invite the outside in. Available in 2 pane and 4 pane, Lumi lift and slide doors are every bit as stunning as Lumi windows. Equally secure too, with strong locks and robust design features, yet light and effortless to move.

LUMI
SILKA DOOR
COLLECTION

We have created a sleek and effortlessly luxurious range of doors called Silka. They make a stylish statement, while complementing your new Lumi windows.
